	URL	dataportal.aquacross.eu/dataset/zooplankton_checklist_ddbr
	Abstract	Based on informations from various bibliographical references, the work presents the list of 945 zooplankton species ever recorded in the Danube Delta Biosphere Reserve. There are also remarks related to the taxonomical position of some species.
	Creation date	2007-01-10
	Publication date	2007-10-31
	Last revision date	2007-06-29
	Lineage	The analyses of the zooplankton-data were carried out in 2006, by checking the information available in various scientific publications. The synthetic list of taxa excludes the varieties of the species. In case of the taxa nominated in different publication as synonyms, the authors chose to mention the most common synonym of the species. The species belonging to a certain zooplankton-category are listed in the alphabetical order of their names (not in systematical order, not according to their phylogeny). The bibliographical references that mention a certain zooplankton taxa are indicated in the angle brackets
